WCCCD Forms Center: Decision Brief

District forms, external submissions, and request tracking on SharePoint

For: Yoseph Demissie, CIO | From: Eric Crutchfield | November 2026

Problem

District forms are non-fillable PDFs scattered across shared folders. There's no controlled way to take files from outside parties, and requests aren't tracked to closure, so there's no audit record.

What it delivers

- **Forms portal.** One SharePoint site and library where employees find every approved form, converted to fillable PDF, and how to submit it.
- **External submissions.** Controlled intake for files from vendors and outside parties, with a purchasing module for RFPs.
- **Request tracking.** Each request recorded from submission through approval, fulfillment, and closure.

Approach

Phase	What happens	Output
1. Requirements	Pick the IT forms and one workflow. Set naming, ownership, permissions, and retention. Confirm licensing and external sharing.	Approved pilot scope
2. IT pilot	Build the site and Forms library, convert IT forms to fillable PDFs and load them, and run one request with routing, decisions, and closure.	Working IT forms area
3. Purchasing module	Guest sign-in, sealed library, receipts, deadline close, evaluator access, and a fallback link. Tested before any live RFP.	Validated RFP intake
4. Expand	HR, Institutional Effectiveness, and Academic Affairs, converting each department's forms. Name owners, train, and set a review cycle.	Department rollout

Built on tools WCCCD already licenses: SharePoint, Power Automate, Microsoft Forms, Entra, and Purview. Confirm any added licenses before Phase 3.

Purchasing module

Vendors sign in as guests and upload to a sealed library, with receipts and automatic close at the deadline. The Purchasing Module brief has the detail, with joining MITN as a simpler alternative.

Build options and timeline

Option	Outside cost	IT pilot live	Purchasing ready
1. Eric builds	$0	Early March 2027	Late May 2027
2. Eric builds with 50 hours of consultant support	$7,500	Late January 2027	Late March 2027
3. Consultant builds	$25,000 to $30,000	Mid-December 2026	Mid-February 2027

Assumes about 3 hours a day from Eric and a consultant at $150 an hour. Options 1 and 2 keep the skills in the district. Approvals and Purchasing's schedule set the pace more than hours do.

Risks to manage

- Flows need a service account and a named support owner.
- RFP controls must be proven in testing, and guest access needs Information Security approval.
- ADA Title II web rules apply by April 2027. The site targets WCAG 2.1 AA; confirm with counsel.

Decision requested

Approve the direction and the IT pilot, and choose a build option. Name business owners for forms (IT), external intake (Purchasing), and request tracking.
